CHAIRMAN INTRODUCTORY WORD

Professor Ešref Gačanin, PhD
Association of Consulting Engineers BiH

Dear Colleagues, Attendees, Participants and Friends,

On behalf of the Organising Committee, it is my great pleasure and honour to extend a warm welcome to the 1st Urban Planning and Regional Development Conference to be held in Sarajevo, Bosnia and Herzegovina, in October 2018.

Started as a vision of three established and respected institutions: Association of Consulting Engineers of Bosnia and Herzegovina, IPSA Institute, Sarajevo and Association of Architects in Bosnia and Herzegovina, this important and pioneer event will serve as an innovative platform to enable exchange of knowledge and ideas between participants, stakeholders and leading experts in the region and abroad, in the field of spatial and urban planning and related disciplines.

In the region with declining population numbers, it is still cities that attract people, mainly because of the „higher quality of life“. When asked to describe this expected rise in life quality, people most commonly use words mobility and accessibility. Previous puts priority task to planners and policy makers – to create an urban development model that will enable existing and new urban developments to be mutually linked and accessible, and to upgrade the potential for serving the mobility needs generated by means of passenger transport.

During two interesting days, in vibrant and diverse city of Sarajevo, we will learn about New Approach in Urban Infrastructure Planning Strategies in exciting discussions covered by international lecturers. Also, interested participants will have the opportunity to display their own papers/posters on the above mentioned theme of the Conference, which will bring great and interesting talks onto the table. Young colleagues from the universities will take part in organized workshops, whose results and solutions on contemporary problems within the City, will be displayed during official program of the Conference.

We take great pride in bringing together participants of different international, educational and professional background. The international and scientific program committee as the local organising committee hope to make this Conference an exciting and memorable event. With your help and commitment to our goal, we can make this effort successful and long-lasting. Having this in mind, we can easily already acknowledge the importance of the 1st Urban Planning and Regional Development Conference, for its results can change the way we think, perceive and experience urban infrastructure possibilities and power.

I would like to thank each one of you for attending our Urban Planning and Regional Development Conference for the first of hopefully many times. Take this opportunity to stay engaged, keep us proactive and to help shape the new urban infrastructure planning strategies together.

Thank you for being part of this.

Yours sincerely,

Prof.dr. Ešref Gačanin, PhD
Conference Chairman
