

TEMA E / THEME E

Implementation of the new intelligent infrastructure with signalsafety and telecommunication systems in the railway corridors

Boštjan Hernavs

Određivanje pozicije voza u tunelu pokrivenog GSM signalom

Tunnel coverage GSM signal and determination of train position in tunnel

Vukašin Janković, Zoran Ž. Avramović

Program Marko Polo II

Program Marco Polo II

Nermin Čabrić, Mirko Vulić

Tendencije razvoja interoperabilnosti evropskog željezničkog sistema

Interoperability of the European railway system tendencies

Azra Ferizović

Timetable based railway infrastructure development on the Hungarian railway network

Zoltan Horvath

Nova institucionalna struktura aktera restrukturiranog železničkog sektora

New institutional structure of actors in restructured railway sector

Dragomir Mandić, Slobodan Rosić

Simulacioni model bilansa poslovanja kompanije kod uvođenja naknada za korišćenje željezničke infrastrukture

Simulation model of the company's business balance when introducing the charges for use of railway infrastructure

Aleksandar Blagojević, Branislav Bošković, Slađana Okolić

Priprema i provedba investicija u željezničku infrastrukturu s ciljem optimalne organizacije prometa – Uloga i važnost stručnjaka tehnologije prometa

Preparation and implementation of investments in railway infrastructure with the objective of optimising traffic organisation – Role and importance of experts in the field of traffic technology

Franc Zemljić

Signalno sigurnosni uređaji brojač osovina BO23 i detektor vlaka TDR14 za razinu sigurnosti SIL4

Signalling safety devices axle counter BO23 and train detection system TDR14 for safety integrity level SIL4

Zvonimir Viduka, Hrvoje Horvat

Upravljanje željezničke infrastrukture sa upotrebom prostorskih informacijskih sistema

Railway infrastructure management using spatial information systems

Edvin Hadžiahmetović, Borut Jagarinec

Analiza mogućnosti stvaranja sistema održivog finansiranja željezničkog sektora Bosne i Hercegovine

Analysis of the possibility of creating sustainable system of Bosnia and Herzegovina railway sector funding

Izet Mehinagić

Monitoring u fazi gradnje infrastrukturnih objekata i upravljanje građevinskim otpadom

Monitoring during construction phase of infrastructure objects and construction waste management

Aida Muminović, Elma Kavazović, Jasmina Čomić, Vedad Suljić

The Austrian hot box detection system TK 99

Andreas Schobel, Johannes Karner

Utjecaj tipa vlaka i ravnosti vozne površine tračnica na buku u okolišu

Influence of train type and rail surface roughness on noise in the environment

Stjepan Lakušić, Marijan Bogut, Ivo Haladin

Reducing passenger change over time by optimizing railway vehicles

Bernhard Ruger

Novi sustav osposobljavanja izvršnih željezničkih djelatnika, koji rade u tehnološkim procesima rada, uoči interoperabilnosti prometnog sustava u EU

The new training system for executive rail workers who work on rail technological processes on the face of interoperability of EU transportation system

Vojko Radković, Drago Sever

Održavanje objekata donjeg stroja željeznica (mostovi i tuneli) i iznalaženje prioriteta intervencija

Maintenance of railway substructure (bridges and tunnels) and intervention priority indentifying

Nebojša Prostran
