

TEMA C / THEME C

Stabilizacija kolosiječnog zastora lijepljenjem – Iskustva iz Europske Unije i Hrvatske
Ballast stabilization using bonding – Experiences from European Union and Croatia

Stjepan Lakušić, Maja Ahac, Ivo Haladin

Opentrack – A tool for simulation of railway operation

Andreas Schobel, Daniel Hurlimann

Rheda 2000@ ballastless track' system of polyvalent width designed to high technical assistance for the monitoring and quality's assurance

Alejandro Mosquera, Manuel Barredo, Pilar Dominguez

Putnički terminali za željeznice velikih brzina

High speed rails terminals

Emir Fejzić

Korištenja roštiljnih sidrenih konstrukcija kod nestabilnih kosina na prugama

Use of structural truss anchor structures on the instabilities slopes of the railway

Milan Rakić, Zdravka Blagojević, Nebojša Prostran

Boarding assistance devices for improving railway vehicle accessibility

Bernhard Ruger, Goran Simić

Primjena reciklirane gume u proizvodnji apsorbirajućih betonskih barijera za zaštitu od buke

The application of recycled rubber in the production of absorbing concrete noise barriers

Stjepan Lakušić, Ivo Haladin, Ana Baričević

Savremene konstrukcije gornjeg stroja

Modern construction of superstructure

Alen Mehić, Emir Jašarević, Amir Fejzić, Vedran Ibrulj

Zaštita planuma pruge od agresivnog djelovanja vodotokova sa montažnim prefabrikovanim zagatima

Protection of railway base from aggressive action of water flows with prefabricated assembly cofferdams

Zdravka Blagojević, Ljubica Kesić, Nebojša Prostran
