

# 4<sup>th</sup> CONFERENCE ON URBAN PLANNING AND REGIONAL DEVELOPMENT

First call

Dear colleagues,

The Association of Consulting Engineers of Bosnia and Herzegovina is hosting the **Fourth Conference on Urban Planning and Regional Development**, to be held in Sarajevo on **15<sup>th</sup> and 16<sup>th</sup> June 2023**.

15 November 2022 saw the birth of the 8 billionth resident of our planet. The number of urban dwellers is on the rise. According to UN research, two thirds of the world population will be living in cities by 2050. Urban planning and regional development are faced with numerous problems. In order to plan successfully for the development of urban, suburban, and functional regions, the EU has prepared a host of documents and initiatives focusing on the development of sustainable and smart cities.

Particularly singled out was the importance of mutual dependence between urban and rural areas. In 2020 the EU adopted the TA2030 Territorial Agenda, which provides a political framework for spatial planning in Europe and its regions and communities.

It is the task of the decision makers at all levels of government to contribute to a more inclusive and sustainable future in all places, as well as to help reach the sustainable development goals in Europe. TA2030 contains two all-encompassing goals – Fair Europe and Green Europe – which have six priorities for the development of the European territory as a whole.

EU has prepared a host of funds for the financing of various projects for sustainable and smart cities.

An important document dealing with urban planning and regional development is the Sofia Declaration on the Green Agenda for the Western Balkans (GAWB) 2021-2030. GAWB consists of five pillars: Decarbonization, Circular Economy, Elimination of Pollution, Sustainable Agriculture, and Nature and Biodiversity Protection.

The Fourth Conference on Urban Planning and Regional Development will gather experts, scientific workers, and international lecturers from the broader region and Europe, as well as government representatives, with the goal of analyzing the experience so far and future challenges in integrated development of cities. It represents an opportunity to establish a strong forum for a versatile interactive developmental cycle, which will enable faster implementation of European urban planning and regional development policies.

We expect your active participation in the organization and work of the Fourth Conference on Urban Planning and Regional Development.

Sincerely yours,

Ešref Gačanin, PHD  
President of ACE BH
