**WATER
CONGRESS**

Hotel Holiday / Sarajevo / June 18-19th

2026

Dear Colleagues,

The Association of Consulting Engineers of Bosnia and Herzegovina is organizing the **5th Water Congress**, which will be held on June 18–19th, 2026, in Sarajevo.

There are few resources on which humanity depends as much as it depends on water. Water makes up between 60 and 75% of the human body. Its lack leads to serious health consequences and threatens life itself. Yet, although water is all around us, it is becoming increasingly clear that access to quality water is no longer guaranteed.

Inadequate water management, combined with increasingly evident climate change, is causing a water crisis. In addition to the scarcity of drinking water, the consequences are increasingly frequent and severe floods, droughts, wildfires, and ecosystem degradation. Extreme hydrological events threaten human lives and health, infrastructure, the economy, and biodiversity.

At the same time, water is also a key part of the solution for climate change adaptation and mitigation. Sustainable water management strengthens the resilience of societies and ecosystems, reduces disaster risk, protects public health, and contributes to reducing greenhouse gas emissions.

In this context, the 5th Water Congress aims to bring together experts, researchers, decision-makers, representatives of institutions, the private sector, and civil society to exchange knowledge, experience, and innovative solutions for water management.

Like its predecessors, the 5th Water Congress will provide a platform for interdisciplinary dialogue, networking, and strengthening cooperation at the national, regional, and international levels.

We look forward to your participation and active contribution to the work of the 5th Water Congress.

Sincerely,

Association of Consulting Engineers of Bosnia and Herzegovina
